PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of production experience building a SaaS CRM and AI-calling platform end to end. Shipped a WebRTC/SIP browser dialer embedded in five CRMs, 45+ Node.js/Express integration microservices and a large Angular CRM frontend. Strong in OAuth 2.0, webhooks, background jobs (BullMQ), MongoDB data modelling and Docker/GitLab CI/CD delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, SQL, Java, PHP, Apex

Backend: Node.js, Express.js, REST APIs, Webhooks, WebSockets (ws, Socket.IO), BullMQ, node-cron, JWT, OAuth 2.0, HMAC/SHA-256 request signing, CRM SDKs (HubSpot, Pipedrive, Zoho, Salesforce Open CTI, Freshworks)

Frontend: Angular (RxJS, Reactive Forms, i18n), React, Next.js, Bootstrap, Angular Material, Chrome Extensions (MV3), Salesforce LWC

Data: MongoDB (Mongoose, aggregation, TTL indexes), PostgreSQL, MySQL, Redis

Voice & AI: SIP.js, WebRTC, Web Audio API, LLM tool/function calling, OpenAI, Deepgram, Soniox

DevOps: Docker, Docker Compose, GitLab CI/CD, AWS (S3, EC2, Lambda), Linux, Git, multi-environment deployments

PROFESSIONAL EXPERIENCE

Profunnel Technologies Pvt. Ltd. (Pronnel CRM & Convarza AI Calling) — **Jul 2024 – Present**

Member of Technical Staff – Full Stack Engineer (joined as Intern MTS) — *Mathura, India*

AI Calling Platform & CRM Dialer (Angular, SIP.js, Node.js)

- Built a **WebRTC/SIP browser dialer** (SIP.js) for outbound and inbound calls, ring/dial tones, device settings and live call summaries, embedded inside **HubSpot, Pipedrive, Zoho CRM, Freshworks and Salesforce**.
- Developed a unified multi-CRM settings app: AI agent configuration, visual prompt-flow editor, voice/language selection, SIP channel management and a billing & usage dashboard.
- Integrated the HubSpot Calling Extensions SDK and Pipedrive App Extensions SDK (handshake, click-to-call, incoming-call events, call-state sync); built a Salesforce app with LWC, Apex and Open CTI.
- Engineered the **OAuth 2.0 backend** with per-CRM credentials, automatic token refresh with retry on 401/403, safe concurrent refreshes and refresh tokens kept out of API responses.
- Queued AI calls from Freshworks workflows via channel webhooks and automated call-agent provisioning from users' SIP credentials.

Integration Microservices (Node.js, Express, MongoDB, BullMQ)

- Built and maintained **45+ integration microservices** on a shared template (OAuth connect, webhook triggers, actions, SHA-256 signed invocations).
- Meta Lead Ads sync with leadgen webhooks, rate-limited background jobs, exponential backoff and missed-lead backfill; LinkedIn Ads, Google Ads, Snapchat and X Ads.
- Payments & documents: Stripe, Razorpay, PayPal (webhooks, invoice PDFs), DocuSign, Zoho Sign, SignWell. Meetings & dev tools: Zoom, Webex, Google Meet, GitHub, GitLab.
- AI agent tools: LLM tool endpoints for calendar booking, and a meeting summarizer using Deepgram/Soniox transcription and OpenAI.

Messaging, Live Chat & Web Analytics

- Custom web tracker with rrweb session replay, heatmaps, funnels and error tracking; live-chat backend (WebSockets, PostgreSQL) with an embeddable Next.js widget; WhatsApp listener service.

Pronnel CRM Frontend (Angular)

- Role-based access control (RBAC), billing (subscriptions, coupons, plan-based gating), automation version history and an in-app calling dialer.
- LinkedIn-to-CRM Chrome extension (Manifest V3) and SEO-optimized product websites with free developer tools.

PROJECTS

OrbitCRM – Open-Source CRM (Next.js, TypeScript, MongoDB, Docker) — orbitcrm-6cm4.onrender.com | github.com/amanjhacodes55/orbitcrm

- Built a monday-style work-management CRM: boards with table/kanban/calendar views, saved views and filters, tasks, search and an **automation engine** with catch hooks and signed outbound webhooks.
- Added an omnichannel inbox (live chat widget, threaded email with templates, SMS, WhatsApp), a dialer, and a **developer platform** with OAuth app authorization, a versioned REST API and an app marketplace; deployed on Render via Docker.

CodeCrack – Coding Judge & Practice Platform (Next.js, Node.js, MongoDB, Python, Docker) — codecrack-6okk.onrender.com | github.com/amanjhacodes55/codecrack

- Built a HackerRank-style judge running untrusted code against hidden tests in a **network-isolated Docker sandbox** (CPU/memory/process limits, AC/WA/TLE/RE verdicts) plus a **step-through debugger** with breakpoints and reverse stepping.
- Added Google/GitHub login (Auth.js), discussions, notifications, leaderboard, timed mock tests and an admin review pipeline that auto-validates community problems; 71 problems verified against brute-force solutions.

EDUCATION

B.Tech, Computer Science & Engineering – GLA University, Mathura | CPI: 8.27/10 — **Jun 2025**

Intermediate (XII) – Vidya Devi Jindal School, Mathura | 78.8% — **2021**
