AMAN JHA

Full Stack Software Engineer | Node.js | Angular | TypeScript | CRM Integrations | VoIP & AI Calling

Kosi Kalan, Mathura, Uttar Pradesh 281403 | +91 8941951465 | amanjhavdjs12tha@gmail.com
LinkedIn: linkedin.com/in/aman-jha-07334a254

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 2+ years of production experience building a SaaS CRM and AI-calling platform end to end. Shipped 3,700+ commits across 75+ repositories: 45+ Node.js/Express integration microservices (Meta Ads, LinkedIn Ads, Google Ads, HubSpot, Zoho, Pipedrive, Salesforce, Stripe, Razorpay, PayPal, DocuSign, Zoom, WhatsApp and more), a large Angular CRM frontend, a WebRTC/SIP browser dialer embedded in five CRMs, and a custom web-analytics engine with session replay. Strong in OAuth 2.0, webhooks, background jobs, MongoDB data modelling and Docker/GitLab CI/CD delivery.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3/SCSS, SQL, PHP, Apex, Java

Backend: Node.js, Express.js, REST APIs, Webhooks, WebSockets (ws, Socket.IO), BullMQ, node-cron, JWT, OAuth 2.0, HMAC/SHA-256 request signing, Winston logging

Frontend: Angular (RxJS, Reactive Forms, ngx-translate i18n), React, Next.js, Bootstrap, Angular Material, Chrome Extensions (Manifest V3), Salesforce LWC

Databases & Cache: MongoDB (Mongoose, TTL indexes, aggregation), PostgreSQL, MySQL, Redis

Voice & AI: SIP.js, WebRTC, Web Audio API, noise suppression, LLM tool/function calling, OpenAI, Deepgram, Soniox speech-to-text

Cloud & DevOps: Docker, Docker Compose, GitLab CI/CD, AWS (S3, EC2, Lambda), multi-environment deployments (dev/staging/prod), Linux, Git

CRM & Platform SDKs: HubSpot Calling Extensions SDK, Pipedrive App Extensions SDK, Zoho CRM SDK & Deluge, Salesforce Open CTI, Freshworks, Meta Graph & Marketing API, Google Ads API, rrweb, PostHog

PROFESSIONAL EXPERIENCE

Profunnel Technologies Pvt. Ltd. (Pronnel CRM & Convarza AI Calling) **Jul 2024 – Present**
Member of Technical Staff – Full Stack Engineer (joined as Intern MTS) *Mathura, India*

AI Calling Platform & CRM Dialer (Angular, SIP.js, Node.js)

- Built a **WebRTC/SIP browser dialer** with SIP.js covering outbound and inbound calls, ring/dial tones, microphone selection, audio-device settings and live call summaries, embedded inside **HubSpot, Pipedrive, Zoho CRM, Freshworks and Salesforce**.
- Developed a **unified multi-CRM settings app** (500+ commits) with platform-aware theming. It covers AI agent configuration, a visual prompt-flow editor, voice and language selection with caching, SIP channel management, and a billing and usage dashboard.
- Integrated the **HubSpot Calling Extensions SDK** and **Pipedrive App Extensions SDK**, handling the SDK handshake, click-to-call, incoming-call events and call-state sync between the dialer and the host CRM.
- Built a **Salesforce** managed app with **Lightning Web Components, Apex and Open CTI** for click-to-call, phone and email record handling, and a call-queue editor.
- Built **Zoho CRM custom actions** with a Deluge script generator and auto-resizing embedded iframes, and queued AI calls from **Freshworks workflows** through channel webhooks.
- Engineered the **OAuth 2.0 backend** (pronnel-ai-plugin) with per-CRM client credentials, automatic access-token refresh with retry on 401/403, safe handling of concurrent refreshes, user-level scoping, and refresh tokens kept out of API responses.
- Automated **call-agent provisioning** by matching each user's SIP credentials to channel regions and domains, so missing agents are created as soon as the CRM user is identified.

Integration Microservices & Marketplace (Node.js, Express, MongoDB, BullMQ)

- Built and maintained **45+ integration microservices** on a shared base template (OAuth connect, webhook triggers, actions, SHA-256 signed invocations), covering ads, payments, e-signature, meetings, messaging and developer tools.

- **Meta (Facebook) Lead Ads:** built page and lead-form sync, leadgen webhooks, background jobs with rate limiting, **exponential backoff capped at 8 days**, a 30-day polling window, backfill of missed leads and a Conversions API service for ads, datasets and businesses.
- **Ad & social platforms:** integrated LinkedIn Ads lead forms, Google Ads, Snapchat, Twitter/X Ads, Instagram, Facebook and Threads posting, and 99acres real-estate leads.
- **Payments & documents:** integrated Stripe, Razorpay and PayPal (order capture, transaction webhooks, invoice PDF generation) and DocuSign, Zoho Sign and SignWell (envelope tracking, real-time file watching for large documents).
- **Meetings & dev tools:** integrated Zoom (encrypted credentials, registrants, participant webhooks), Webex, Google Meet, Zoho Meeting, and GitHub/GitLab (issues, branches, PR creation and merge triggers linked to CRM items).
- **AI agent tools:** built LLM tool endpoints for an AI chatbot to query calendars, book, update and cancel appointments, and select hosts. Built a meeting summarizer that uses Deepgram/Soniox transcription and OpenAI summaries.

Messaging, Live Chat & Web Analytics

- Built a **custom web tracker and analytics engine**: rrweb session recording with packet chunking and exactly-once storage for heavy web apps, heatmaps, funnels, rage-click and JS-error tracking, dwell time and UTM attribution, with leads sent to the CRM via webhooks.
- Developed a **live-chat backend** (WebSockets, PostgreSQL, Papercups/Elixir) with two-way messaging, attachments signed with AWS S3 SigV4, customer de-duplication by email or phone, and an embeddable Next.js/React chat widget.
- Built a **WhatsApp listener** service and Chrome extension backend over WebSockets with JID/LID chat mapping, binary buffer handling for media over 16 MB, and webhook-driven CRM updates.

Pronnel CRM Frontend (Angular, 800+ commits)

- Implemented **custom roles and permissions (RBAC)** with an optimized edit-access check, and built card filters synced with group-by and board preferences.
- Built **billing features**: subscription profile, coupon codes, promotional-balance debit and plan-based feature gating.
- Built automation **version history with restore**, a message-queue viewer, an email channel, custom voices, live call events, and a time tracker triggered by automations.
- Built an in-app **calling dialer** using WebSockets and an app-connection manager for the integration marketplace. Added infinite-scroll pagination, multi-language i18n and mobile-responsive layouts.
- Developed a **Chrome extension (Manifest V3)** that captures LinkedIn profiles and companies into the CRM, with templates, notes, org switching, a time tracker and fewer redundant API calls.
- Built SEO-optimized product websites (PHP) for Pronnel and Convarza, including free developer tools (JSON formatter, cron builder, API tester, QR generator, PDF editor, image compressor) and CRM integration guides.

EDUCATION

Bachelor of Technology, Computer Science & Engineering – GLA University, Mathura | CPI: 8.27/10 **Jun 2025**
Intermediate (Class XII) – Vidya Devi Jindal School, Mathura | 78.8% **May 2021**
High School (Class X) – Vidya Devi Jindal School, Mathura | 85.8% **May 2019**

CERTIFICATIONS & ACTIVITIES

- Java Programming – Infosys Springboard
- Introduction to Cybersecurity and Cybersecurity Essentials – Cisco Networking Academy
- Participated in multiple university hackathons and techathons; strong foundation in Data Structures & Algorithms and System Design
